

REVIEW: These are medical warnings on a prescription label. Tell what they mean. (OPD 112). (Look over the vocabulary on 112-113 to make sure they remember.)

1. Do not drive or operate heavy machinery
2. Do not drink alcohol.
3. Do not take with dairy products (milk or cheese)
4. Take one hour before eating.
5. Finish all medication
6. Take with food or milk

Read and discuss this paragraph about thermometers.

A thermometer measures temperature. One thermometer measures the air temperature. The other thermometer measures a person's temperature. Thermometers measure temperature in degrees. Normal temperature is 98.6. If a person has temperature above 98.6, they have fever.

Open Easy Stories Plus. Turn to page 82. Read the story one line at a time. (Teacher read first, students repeat. After each paragraph choose a student to read the paragraph.)

Write YES or NO. If NO, change the sentence to make it right. (Teachers-Either do them together or let them do them then check. Have them read the correct sentence aloud.)

- _____ 1. Juana Perez has a stomachache.
- _____ 2. The pharmacy is on Mango Street.
- _____ 3. The headache medicine is in aisle 6.
- _____ 4. There is only one headache medicine.
- _____ 5. The pharmacist is wearing a black jacket.
- _____ 6. Juana doesn't have a fever.
- _____ 7. Juana has an allergy.
- _____ 8. Juana has a normal headache.
- _____ 9. the pharmacist gives Juana some capsules.
- _____ 10. The pharmacist says, "Take three tablets every four hours."

Do “Underline the Word from the Story” orally together.

This story has missing words. Fill in the blanks using the word bank below.
(Teachers- after students fill in blanks, have them read their stories aloud.)

allergic	cabinet	degeres	fever	thermometer
boss	capsules	feel	headache	water
